OverDrive: Getting Started on eBook Readers

Install Adobe Digital Editions on your computer or laptop

- Go to our Library homepage (www.sapl.ca).
- Under Quick Links, click on eBooks & eAudiobooks.
- In the OverDrive section, you will find a link to Adobe Digital Editions.
- Once you click on the link, you will be re-directed to the Adobe Digital Editions website.
- Select the Windows or Mac version and install Adobe Digital Editions 3.0 on your computer.

Sign up for a free Adobe account

- You will also need a free Adobe ID to authorize your computer and eReader. While still in the OverDrive section of the library eBooks & eAudiobooks page, click on Adobe ID and create an account using your email and a password of your choice.

Check out, and download books to your computer

- On the Library eBooks & eAudiobooks page, click on OverDrive http://sapl.lib.overdrive.com/. This takes you to our eBooks collection.
- You can browse the book covers on the homepage, click See All, browse by Subject or Collection or use Search to find a book.
- Find an available title in the library’s collection and click Borrow.
- Or, click the book cover to open its details page (where you can read a description, choose a lending period that’s different from your default lending period of 21 days, borrow the title, and more).
- If prompted, sign in to OverDrive using your library barcode (starts with 22222) and PIN (last 4 digits of your phone number).

- After you borrow an eBook, select 📚 to go to your Loans page. From there, use the Choose a format button to select a downloadable format (for the best experience, we recommend EPUB eBook).
- If prompted, authorize ADE with your Adobe ID and password (this is required for downloading Adobe [DRM-protected] eBooks).
- Downloaded eBooks open in ADE.
Transfer eBooks to an eReader

- Connect the eReader to your computer.
- Open ADE on your computer. Ensure you’re in **Library** view by clicking on **Library** at the top left.
- Your eReader should show up under **Devices**.

Click on an eBook that you have downloaded, then drag it over to your device.

**Note:** Transferring an eBook to your eReader will authorize it with the same Adobe ID as your computer.
Safely disconnect your eReader

Windows 7:

Look for the little green checkmark on the bottom right of the computer and select Eject. Wait till you see Safe to Remove ...

Windows 10:

Look for the little green checkmark on the bottom right of the computer. If you do not see it, click on ^ to view hidden icons. Click on Safely Remove Hardware ...

Mac: On your Mac desktop, look for the Kobo eReader icon. Right click on it and select Eject, or, drag it to the Trash.

Return or remove eBooks

You can return a book early through Adobe Digital Editions on your computer. Right click on the book cover and select Return Borrowed Item from the drop-down menu beside your book. For expired book titles, select Remove from Library to delete it from your
